## JAPANESE BEETLES... THEY ARE OUT!!

Ever notice these creepy crawly things? They are Japanese beetles. They can easily devour the leaves of your plants in a matter of hours. Stop in our Charles City location and pick up some beetle traps while you can. Some of the better products we have found that help this problem are the pheromone traps (customers' favorite) and the Seven products that come in a

ready to use spray or dust. The pheromone trap is easy to assemble, and it simply lures the beetle into a bag that they cannot get out of. The Seven dust is simply a dust that you sprinkle on the leaves, and the ready to use spray is the same concept - spray on the leaves.
